REACH European regulation# 1907/2006  
Regulation C&LP-SGH N°1272/2008  
Regulation N°453/2010 du May 20th, 2010 replacing appendix II of REACH N°1907/2006

Pre registration was performed for all products sold by SOPHIM with the exception of the exempted ones: MC30 and MC300 as polymers; squalene from natural origin, oils and butters from natural origin. We established the uses according to the COLIPA guidance mapping table.

« SVHC » (Substances of Very High Concern) list was updated on June 18th, 2010. All products sold by SOPHIM do not contain those substances: none of them is used as an ingredient in the manufacturing process.

To comply with the article 40 from regulation C&LP-SGH N°1272/2008, a notification of our commercialized products is planned for January 3rd, 2011.

The following products will be registered:

• Sophiderm®	(CAS 111-01-3)	Planned registration: 2013
• Phytosqualan	(CAS 111-01-3)	Planned registration: 2013
• Biophytosébum®	(CAS 1080020-44-5)	Planned registration: 2018
• Phytowax® Castor PRI22	(CAS 438551-43-0)	Planned registration: 2018
• Phytowax® Castor PRI18	(CAS 438551-44-1)	Planned registration: 2018
• Phytowax® Castor PRI16	(CAS 438551-45-2)	Planned registration: 2018
• Phytowax® Olive POL18	(CAS 354820-04-5)	Planned registration: 2018
• Phytowax® Olive POL16	(CAS 438551-99-6)	Planned registration: 2018
• Phytowax® Olive POL14	(CAS 438551-85-0)	Planned registration: 2018
• Phytowax® Olive POL12	(CAS 477883-66-2)	Planned registration: 2018
• Phytowax® Olive POL10	(CAS 438551-82-7)	Planned registration: 2018
• Phytowax® Olive POL8	(CAS 438551-84-9)	Planned registration: 2018

The following products will not be registered. We will stop selling those by June 30<sup>th</sup>, 2011.

• Phytowax® Olive POL6	(CAS 438551-83-8)
• Sweet Almond cerester	(CAS 477883-62-8)
• Shea cerester	(CAS 477883-65-1)
• Sunflower cerester	(CAS 97766-00-2)
• Olive cerester	(CAS 93455-81-3)

The new classification for substances according to the new regulation is initiated. As of today, substances classified as dangerous and used on site are processing aids that are bought.

Starting December 1st, 2010, regulation N°453/2010 from May 20th, 2010 is replacing REACH N°1907/2006 appendix II.

Our products are mainly substances. We plan to update labeling and MSDS for December 1<sup>st</sup>, 2010. Biophytosébum (CAS 1080020-44-5) is a mixing of decyl esters of olive oil fatty acids and squalene. Squalene is exempted. We plan an update for biophytosebum labeling and MSDS for December 1<sup>st</sup>, 2010.

Please do not hesitate to contact me should you have any question.  
Best regards
